My dear Gray

The printing *Genera Plantarum*  
is now so far advanced that I can see that  
the volume (iii) will be within a very few  
pages more or less of the same bulk as  
vol II. I shall therefore fix it at the  
same price as per enclosed memorandum  
I sell single copies here at cash price or  
if twelve or more copies are taken at once  
I give them at trade price - in your case  
there will be a small extra charge for  
expenses to Liverpool and there as I suppose  
the best way to send them to you will be as  
before in a box from Liverpool - I have  
great difficulty in hurrying on the printers  
who only give me one sheet per week and the

Index is always very long, printing bad, confidently hope to get the part out by the end of March so that I would be obliged to you now to let me know what number of copies you take for your friends. There are now six sheets in types of which I have corrected the proofs but have not yet had the review or clean copies - and there will be about four more besides the index which will fill two sheets - all is written out for press and only waits the printer. I am very thankful for having been able to do them much for my shortage of breath gains much upon me and interferes much with my working power.

Yours very sincerely  
George Beathan
